ATLAS

BUSINESS GROUP OF COMPANIES LTD

Maximising real value from your IT infrastructure

We deliver from "start to finish"

a flexible and individually tailored suite of services across the computing, networking and consulting spectrum from managed services, communications and hosting to security, back-up and data recovery, as well as specific projects to maximise the value from Clients' IT Infrastructures.

Why choose Atlas?

- ✓ Entirely customer-centric; emphasising our focus on 'listening and understanding to our customer requirements

- ✓ Business relevance focused approach to IT systems and service value justification.

- ✓ Deep-rooted convictions on honesty, integrity and objectivity.

- ✓ Belief in maximising overall value for clients rather than a total cost focus.

- ✓ A long term relationship and not a commodity driven business.

- ✓ Over 20 years and hundreds of man years experience in the Sector

- ✓ Ability to undertake projects with mixed architectures and hybrid solutions which often provide more business value than a 'one size fits all' solution.

- ✓ ISO 9001, ISO 27001 and IIP registered.

Our Capabilities & Clients

Our clients are from a range of different private sector operations and industries, many of whom have been with Atlas in excess of ten years,

We are experts in the fields of Unix, Linux, Apple, Windows, LAN/WAN communications and networking.

We provide best-practice and best-investment returns consultancy to all our clients, but are equally ready to work with existing equipment to ensure a secure operational environment.

A team of dedicated professional engineers, with between 5 and 25 years technical experience, holding not only Vendor Accreditations, but also internationally recognised Specialist Accreditations e.g. CISSP.

Extensive project management experience including Server Replacement/Upgrades

Specific Technology and Service Capabilities

Partnerships with key supply-side technologies businesses, to provide clients with products that meet a complete business solution.

Our engineering and technical expertise is aligned with our own secure UK network with diverse multiple Tier 1 and Telco gateways connecting our militry grade data centre with additional datacentres nationwide.

Our own 'super secure' Ex-Nuclear bunker facility provides network connectivity, data centre services, large capacity computing arrays and a safe working environment for relocating people in the event of a business disaster.
